3. Young Professional Training Program in Korea

Five Questions to Young Professionals

1. How the recent climatic extremes are affecting water management for agriculture in your country/region?
2. What new and innovative approach and technologies are being adopted to address these climate change issues?
3. What management approach and solutions are being considered to adapt to climate change?
4. How would you like to modify/augment water management practices and policies in region to generate a long term strategy?
5. What is your view and contribution to promote climate smart agriculture?
